## PROFESSIONAL SUMMARY

Dedicated software developer with a proven track record in maintaining server-side applications and overseeing database management. Possessing strong technical skills and excellent interpersonal abilities, allowing for effective client interaction. Thrives on challenging tasks that drive continual growth in IT proficiency. Dedicated to leveraging technical expertise for positive outcomes in both individual and enterprise contexts

---

## EDUCATIONAL BACKGROUND

### Wikrama Vocational High School

Software Engineering  
2018 – 2021

Attended a specialized program in software engineering. This program provided a comprehensive introduction to programming languages, software design, and development methodologies. Through practical training and project work, I gained valuable skills and knowledge essential for a career in software development.

---

## PROFICIENCIES / SKILLS

- GoLang , Javascript, PHP, Git, MySQL, PostgreSQL, MongoDB, React JS, Node JS, Laravel
- Teamwork, Leadership, Time Management
- English

---

## PROFESSIONAL EXPERIENCE

### Back-end Developer

PT. BRI

November 2022 – Present

- Develop backend systems in Golang to support applications serving over 500,000 users and handling daily transactions.
- Design and implement APIs to improve communication between different parts of the application.
- Collaborate with teams from different departments to align backend features with project goals.
- Optimize existing processes to improve scalability and system efficiency.
- Implement security measures to safeguard user data and ensure compliance with industry standards.
- Engage in code reviews, knowledge-sharing, and mentoring.
- Monitor system performance, identifying and resolving issues to maintain reliability.

### Back-end Developer

PT. BRI

August 2022 – August 2023

Developed some applications, such as Digital Assessment app, applications for monitoring ATM technician's work, and API for the mobile app version. Using Go programming language for the API, and PHP programming language for the website application.

### Full-stack Developer

CV. IDS

June 2020 – August 2020
