SUMMARY

I am a graduate of Informatics at Peradaban University with experience in IT and organizations. He has internship experience at CV. Antero Nusa as IT Support, and has attended Bootcamp at Alterra Academy in developing backend web servers using Golang. Apart from that, I have experience as treasurer and public relations at the Informatics Student Association

TECHNICAL SKILLS

- Languages : Golang, Java, Javascript, Node.js, SQL, Rest API, NonSQL.
- Technologies : Postman, Vscod, Eclipse, Visual Studio, AWS, GCP, Github.
- Other : Algorithms, Data Structures, Computational Complexity, Advance Problem Solving.

PROJECTS

- **StoreID** : involves building the back end of an Ecommerce website using the Golang programming language and the Echo framework. The main goal is to provide a platform that can display products, allow users to add products to shopping carts, and handle the checkout process. In the development process, a solid database design was required to store product and order information, as well as the implementation of strong security features to protect user and transaction data. Using the Echo framework makes it easy to build responsive and reliable backend APIs, while integration with GitHub facilitates source code management and team collaboration. See the source on [Github](#)
- **JobsHuntz** (job search website) : Back end using Golang with Echo framework aims to develop the back end of a job search website. Its main focus is to provide a platform that allows job seekers to search and apply for job vacancies that match their criteria. This involves design and implementation of efficient search features, as well as integration with third-party services to obtain the most up-to-date job vacancy data. In the development process, it is important to ensure the security of user and transaction data, as well as pay attention to website performance so that it can handle a high number of users and traffic. Collaboration using GitHub repositories makes it easier for teams to manage project source code efficiently and make updates regularly. See the source on [Github](#)
- **Other project : AccountApp**: an application for carrying out transactions built using Golang, where this application can be used to make top ups and transfers. **MyTaskApp**: a REST API endpoint created for the application needs of recording projects and tasks from a user. This application was built using Golang, Echo, and MySQL. [Github](#)

WORK EXPERIENCE

CV. ANTERO NUSA

It Support

SLEMAN, YOGYAKARTA

August – September 2019

- During my internship, i was responsible for monitoring and routinely checking the health of computers and LAN networks at partner companies, ensuring optimal performance.
- Handle the computer assembly process professionally to meet the specific needs of company partners. Building an innovative application as an internship final project (PKL) with the title "PT Daya Kharisma Heavy Equipment Rental Application", using the Delphi 7 platform to design efficient and effective solutions for clients.

EDUCATION

ALTERRA ACADEMY

Golang Backend

Jakarta, Dki Jakarta

Oktober 2023 – February 2024

In the 4 months I studied to become a Backend Engineer, the key learning topics I studied were as follows:

- Explore backend web server development with full focus using the Golang programming language.
- Professional in identifying and resolving problems (errors) that arise quickly and efficiently.
- Actively participate in group projects and also capstone projects, producing innovative solutions that become part of the learning portfolio.

PERADABAN UNIVERSITY

Informatics Engginer

- GPA: 3.25 out of 4.00

Brebes, Central Java

2016 – 2022

PROFESSIONAL ACTIVITIES & LEADERSHIP

INFORMATICS STUDENT ASSOCIATION

Treasurer

Brebes, Central Java

2016

- carefully manage the organization's finances, coordinate and represent its interests across all divisions, and deputize as chairman in the absence of the incumbent, while also routinely creating financial reports for documentation and evaluation purposes.

INFORMATICS STUDENT ASSOCIATION

Human Resource

Brebes, Central Java

2016

- I am responsible for creating and sending activity proposals to sponsors, managing the procurement and delivery of invitations to guests, handling the event participant registration process, overseeing the procurement and delivery of certificates to participants, and preparing accountability reports for all activities conducted

CERTIFICATIONS

- Operating CorelDRAW to Become a Graphic Designer by Gamelab Indonesia (Prakerja).
Credential URL : [Gamelab.id/certificate](https://gamelab.id/certificate)
- Techniques for Creating Application Software with an Object Oriented Programming (OOP) Concept using Java Language for Application Developers and Software Analysts (Software and applications developers and analysts not elsewhere classified) by Course Net (Prakerja).
Credential URL : [CourseNet Certificate](https://coursenet.id/certificate)
- Learn Web Programming Basics (Dicoding)
Credential URL : dicoding.com/certificates
- Cloud Practitioner Essentials (Learn AWS Cloud Basics) (Dicoding)
Credential URL : dicoding.com/certificates

LANGUAGE

- Bahasa (Native)
- English (Limited Working Proficiency)

INTERESTS

- Listing interests can be a conversation starter. Don't go overboard on this one though.
- I am an avid masters swimmer and I have read most science fiction novels worth reading.
