About Me

Hello! I'm not just an ordinary Flutter Mobile Developer, I am the bridge between code and creativity. In the past, I was a UI/UX Designer, creating digital experiences that left a lasting impression.

I have traveled a long way, walking to the heart of a technology startup, both from the comfort of my home (remote worker) and on-site adventures (onsite worker). From Indonesia to India, my work has connected me with clients across countries. I am very grateful for the trust they have given me, I try to remain there to provide assistance to them when they need it.

Work Experience

Diginusa Studio

Freelance Flutter Developer | Pay per Project

Work with remote (WFH) system, convert figma UI to Flutter mobile app, integrate API from backend developer. Some also handle UI Design task.
